

# K 5000 / K 7500 Build In Turntable for 500 kg / 750 kg

## Build in turntable with square base plate

Picture: Sizes of a K 5000

### Turntable K 5000 and K 7500 to be applied as build in turntable indoor:

The model U 5000 allows a central load of 500 kg respectively 750 kg maximum.

Thanks to the traversing hollow shaft of this turntable it can be used rather universally, for example, for driving a rotating showcase, rotary objects for indoor and outdoor publicity (for outdoor use the turntable has to be protected by the customer against water, ice and snow), for exhibition objects, for columns as publicity purposes in the cities, either with or without slip ring for rotating current transmission. Especially for outdoor use the wind surface has to be stated which should not exceed 1 m<sup>2</sup>.

### Advantageous features:

- torsion free
- traversing hollow shaft having an inside diameter of 42 mm

- very silent
- suited for both indoor and outdoor operation (with protection)
- maintenance-free
- safety clutch
- rotating current transmission (slip rings)
- turn table applicable also for up to 150 kg hanging load

#### Technical Details:

- total height: 132 mm
- max. centric load: 500 kg (1,100 lbs) or 750 kg (1,650 lbs)
- nominal Voltage: 220 to 240 V, 50 Hz,
- optional 115 V, 60 Hz
- nominal rating: 15 Watt
- rotation speed: 1 rpm, direction clockwise
- dead weight: 16 kg / 32 lbs

#### Additional Equipment::

(on demand and on extra charge)

- Slip ring for rotating current transmission up to 4 ways (standard 4 amp), 8 amp in special design + protective conductor
- cycle operation / reversible operation
- rotation: 1 rpm, counterclockwise
- other rotation speed available on demand
- manually change of rotation direction
- on / off switch
- **security construction for 500 kg hanging load available**

Subject to technical changes

230 V  
115 V

1 rpm

500 kg  
750 kg
